New Diamondback Snake Gaiters keep snakes at bay with a new level of comfort and protection.

Cannon Falls, Minn. — January 7, 2013 — Today, Robinson Outdoor Products LLC, the maker of ScentBlocker® has announced the introduction of the Diamondback Snake Gaiters.

Made from a lightweight, durable polyester shell, the Diamondback Snake Gaiters protect your lower legs from snake bites, thorns, briars, or whatever else is lurking down there. Including water. The 100% waterproof Rainblocker® protection takes care of that. Add in brush blocker shin guards for extra abrasion resistance, and you're good to go.

The Diamondback Snake Gaiters not only offer premium protection, they provide unparalleled comfort. They're paneled up and down, including the front boot cover. Three adjustable straps wrap around the leg while the adjustable stirrup sits under the boot, allowing the hunter to find their perfect fit.

The Diamondback Snake Gaiters measure 17 inches, come in Realtree® Xtra™ or buckskin color and are available in regular or large sizes.
